The drilling block broadly covers the area demarcated in the map covering approximately 186.96 hectares (Refer attached location map and approximate location of drilling block).

The locations of the proposed drilling sites may slightly vary depending upon the requirement of GMDC.

2. **Quantum of work:** The approximate core drilling work is about 4000 meters. The meterage is indicative and may vary about  $\pm$  10%, in such case the contract period may also vary proportionately.

4. **Depth of Bore hole:** The boreholes shall be in the depth range of approximately from **40 m to 60 m**.

In few cases due to geological uncertainties if the borehole is required to be drilled beyond **60 m** depth, the bidder shall be liable to extend the borehole and drill further up to desired depth to complete the borehole for its logical conclusion. However, the extended depth will be restricted approximately to +10 % of initial target depth.

The borehole will be drilled up to the older/ basement formation or may be closed as per the instructions of site geologist. Drilling of boreholes, if required, after studying the litho-logs of the drilled borehole may be closed before as per the instructions of site geologist.

No additional compensation will be paid in case of either short closure or extension of boreholes.

5. **Borehole Spacing:** Borehole spacing will be approximately 200 m  $\times$  100 m.

6. **Borehole Size:** The holes shall be drilled in combination of HQ/HX, NQ/NX size. The payment per meter of drilling will be same for all sizes of drilling.
7. **Type of Drilling:** Diamond core drilling.
8. **Deployment of drill rigs:** The contractor shall deploy at least 02 core drilling rigs of required capacity with sufficient manpower and adequately equipped with all drilling inventory/accessories such as casing, rods, bits etc. However, if required, the contractor may deploy more than 02 no. of drilling rigs to ensure timely completion of awarded work without any additional compensation. The deployment of drills at borehole location site shall be as per requirement and priority indicated by GMDC/GMRICS.
9. **Inclination of boreholes:** Vertical bore holes as per direction of the authorized site geologist.

**10. Survey work:**

- a. GMDC/GMRICS will provide the proposed borehole location plan, borehole co-ordinates, RL of all the areas to be covered under exploration.
- b. In the event of the borehole location shown on plan is not feasible on ground, the alternative location shall be shown by the site geologist.
- c. The successful bidder must make their own approach roads to drill site, water arrangement at boreholes & other required accessories. If any negotiation/discussion is required with local people/landowner, the bidder will carry out such negotiation/ discussion with local people/landowner. Any payments/compensation involved on account of this will be borne by the successful bidder only.
- d. While drilling, wherever water table is encountered, depth of the water table, loss of water and return of water in the borehole should be recorded and to be mentioned in the driller logs. Further, this data must be mentioned in the final drilling report.
- e. Run wise core recovery percentage, type of drilling, size of rod/casing, bit used are to be maintained in a register on daily basis by the site representatives of the agency & to be counter signed by the site geologist. Run wise core recovery will be certified by the site geologist.

**11. Core Recovery:**

The contractor shall make all efforts to obtain minimum 90 % core recovery in all formations. The recovered core and sludge shall be arranged properly in core boxes. Each run shall be marked properly by plastic tag, and the core boxes shall be numbered properly. The successful bidder will have to make arrangements for core boxes at his cost. All the collected samples and selected core boxes shall be handed over to GMDC at desired location. In case of core loss, triple tube core barrels or similar equipment have to be used to obtain required core recovery.

12. In case of lower core recovery in normal geological conditions or jamming of the boreholes before completion of planned depth, re-drilling shall be carried out by the drilling agency at its own cost on the instruction of site geologist. The new borehole

location would be as per the instructions of the GMDC/GMRICS, and the drilling agency will be free to do non-core drilling up to the depth drilled with 90% core recovery in the original under drilled/abandoned borehole and thereafter normal core drilling would resume. If stipulated core recovery is not obtained even in re drilled hole, GMDC/GMRICS shall take a final view regarding its completion and/or abandonment. Decision of the General Manager (Geology) will be final and binding on the contractor in such cases.

**13. Core Arrangement:**

The recovered drill cores shall be arranged properly in good quality PVC core boxes by contractor at his own cost. Each run shall be marked properly, and the core boxes shall be numbered properly.

**14. Core Boxes:** PVC Core boxes with Lid/cover on the top of each stack of 05 core trays shall be arranged/supplied by the contractor at his own cost. All core boxes with core will be handed over to GMDC/GMRICS at the site or Project office of GMDC/GMRICS or at a location specified by the authorized site geologist. Borehole Number, from and to depth, length of core and date should be written by paint on each core box. The specification of core boxes is as under.

Specification for core box	Description
Material	Plastic PP (Polypropylene)
NQ Meters per Tray	5 Meters
HQ Meters per tray	4 Meters
Protection	UV Stabilized
Inter Stackable	HQ, NQ
Other requirements	<ul style="list-style-type: none"> <li>• Completely Waterproof with Plastic Lid each for a stack of 05 core trays</li> <li>• Handles on both sides</li> <li>• Tag holders</li> <li>• Should have facility of column support</li> </ul>

Drilling shall normally conform to the above standards. However, considering the lithology, structure of the rock and in-hole conditions, the standards on core recovery may be assessed as per exceptional site conditions and may be relaxed on case to case by the General Manager (Geology) after ensuring that the bore hole has served the purpose. Accordingly, payment will be made. The decision of General Manager (Geology) in the matter will be final.

**15. Borehole Pillaring & Grouting:** Successful bidder shall erect cemented borehole pillar of size 30"x12"x12" on completion of each borehole and label it at his own cost. The borehole code/ labeling details shall be provided by site geologist.

The land where a borehole is drilled must be reclaimed/made good and brought to the pre- drilling condition before withdrawing the drill machine from the site. Failure to do so would attract the cost towards making the land good and the amount so spent would be payable by the contractor/drilling agency and the same would be deducted

in the subsequent bill submitted after completion of the borehole. Intimation regarding the expenditure incurred would be given by the GMDC's representative at site in writing.

**16. Reporting:** For all the field activities to be carried out as per the scope of work, the site in charge of the successful bidder firm shall report to the authorized site geologist.

**17.** The drilling and the ancillary work, as per specification above, will be executed under the supervision and direction of the site geologist.
